

F

Facial Weakness

“Less than 1 in 10 **stroke** victims get to the hospital in time for a meaningful recovery.”

*Know the signs of **STROKE** and act **FAST!***

A

Arm and Leg Weakness

Facial Weakness: Ask the person to smile.
Does one side of the face droop?

Arm and Leg Weakness: Ask the person to raise both arms.
Does one arm drift downward?

Speech Problems: Ask the person to repeat a simple sentence.
Are the words slurred? Is the sentence repeated correctly?

S

Speech Problems

Time is Critical: If the person shows any of these symptoms, time is important.

Call 911 immediately... Brain cells are dying.
